Official Product & Technical Manual

JOJO Career OS

All-in-One Job Finding, ATS Verification, & Multi-Platform Synchronization Engine

Project Lead: Geeta Jogi (DevSecOps Lead)
Repository: https://github.com/geet264/JOJO-.git
Audited & Hardened: VAPT Certified (OWASP Top 10 Compliant)
Date: November 2026 | Version 1.2

1. Executive Summary & Project Aim

> **Our Aim:** Replace the painful, manual process of job hunting across fragmented websites with a unified Career Operating System. Store your profile once in JOJO, automatically match top-tier jobs with ≥ 80% compatibility, and sync effortlessly across all 8 major job portals.

The Problem We Solved

The Old Way of Job Hunting	The JOJO Way
Re-typing Notice Period and CTC on 6 separate job portals.	**Update Once in JOJO:** Syncs to LinkedIn, Naukri, Indeed, and Instahyre in 1 click.
Browsing hundreds of low-match jobs (20%-40%).	**80%+ Match Filter:** Prioritizes top-tier roles matching your core skills.
Rejection by automated corporate ATS filters.	**Built-in ATS Scorer:** Ranks your resume against Greenhouse, Lever & Workday standards.
Losing track of interview rounds and notes.	**7-Stage Kanban Board:** Visual drag-and-drop tracker with private interview notes.

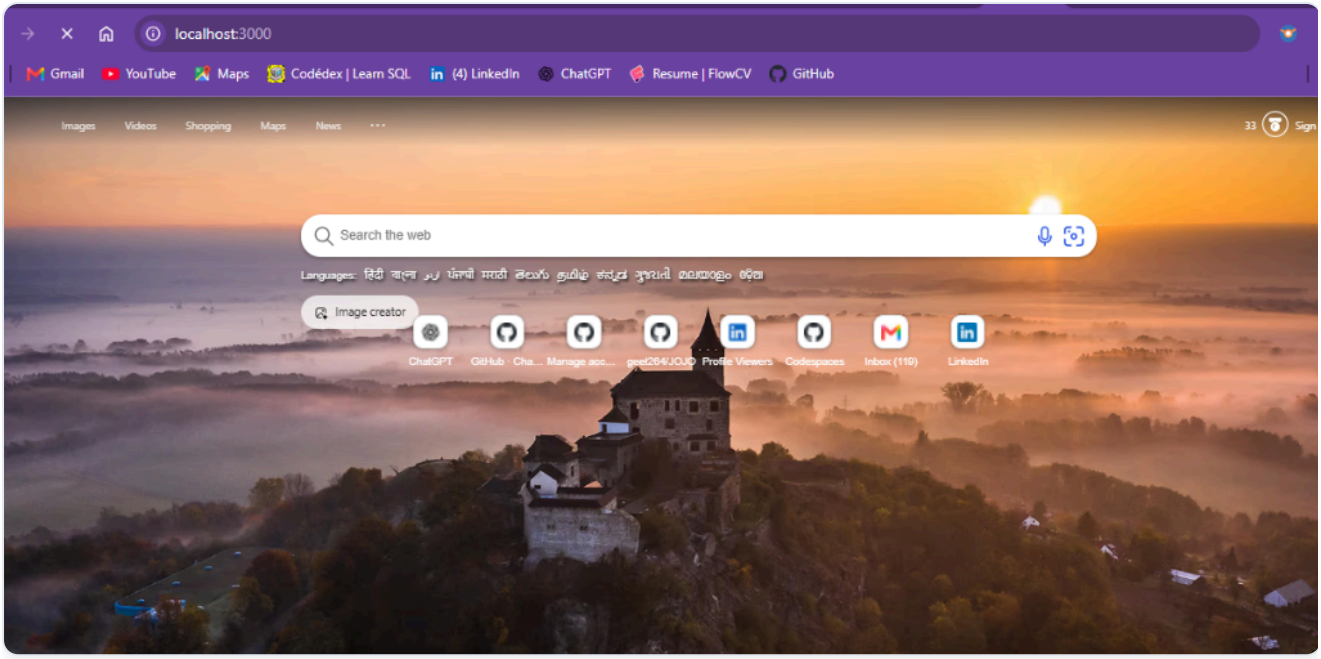

2. What We Have Built (Complete Technical Inventory)

- **Fullstack Next.js 14 Engine:** Built with App Router, TypeScript, and Tailwind CSS on Turbopack.
- **80%+ Match & ATS Algorithm:** Real-time skill vector scoring with missing skills diagnosis.
- **Universal Platform Connector:** Central sync hub managing 8 platform bridges.
- **Chrome Companion Extension:** Manifest V3 content script auto-filling profile forms.
- **7-Stage Kanban Tracker:** Wishlist → Applied → Screening → Technical → Final → Offer → Rejected.
- **1-Click AI Resume Tailor:** Generates targeted 95%+ ATS resume bullets and cover letters.
- **Mobile App Experience & PWA:** Mobile bottom navigation tab bar + phone extension support.
- **VAPT Hardened Architecture:** 12-round bcrypt password hashing, IDOR authorization barriers, rate-limiting, and secure cookies.

3. Screen Walkthrough & Visual Guide

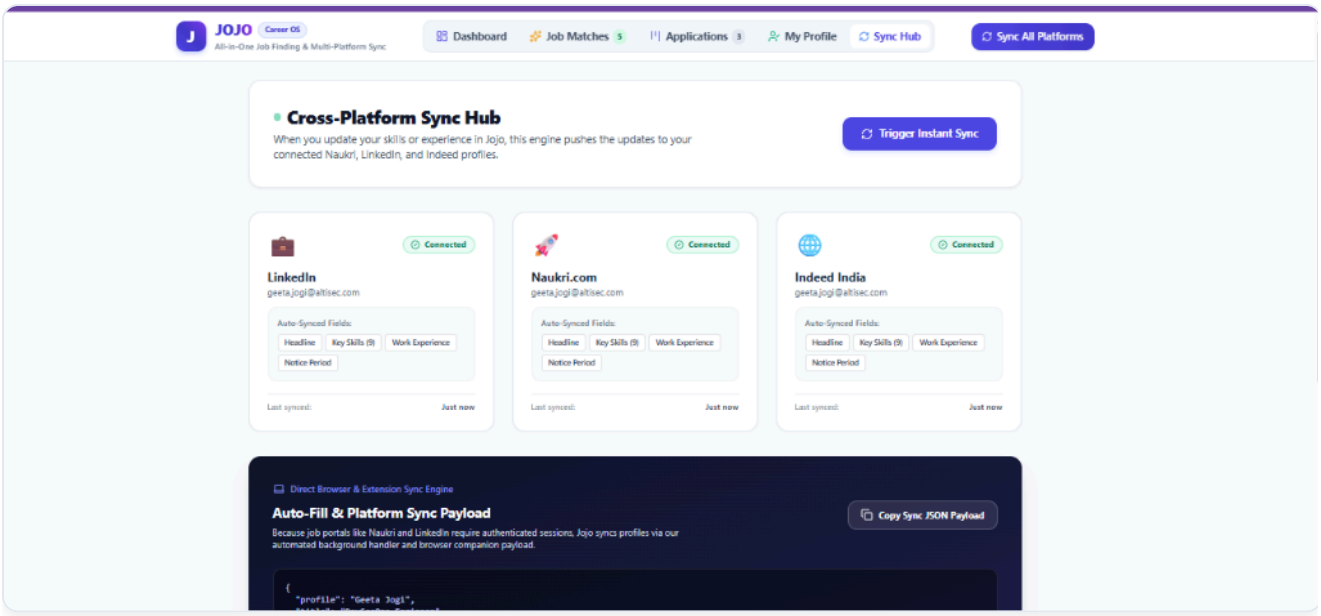

Screen 1: Executive Dashboard

Provides live KPI metric cards (80%+ top matches, target CTC with hike %, 95% average ATS score), application velocity funnel, and Skill Gap Advisor.

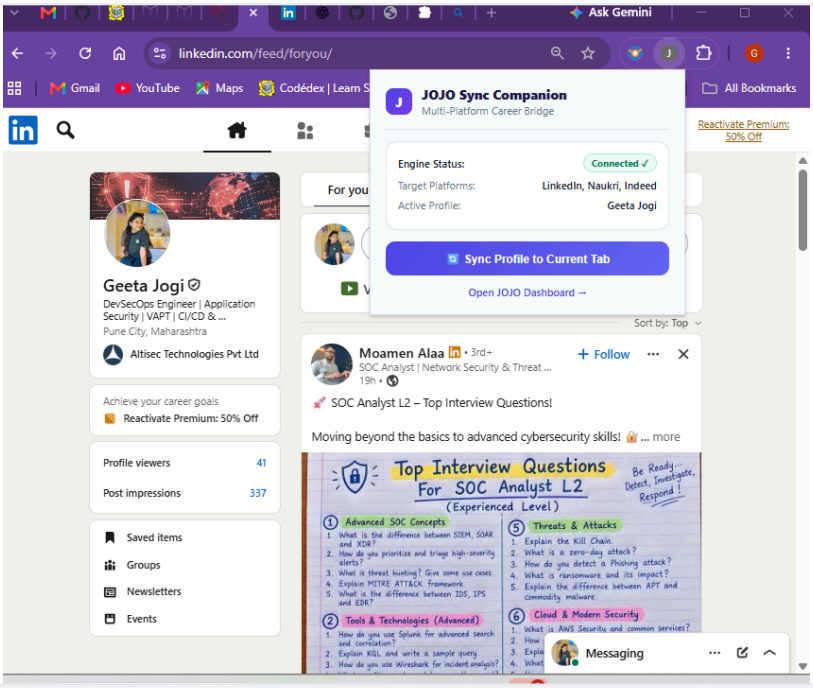

Screen 2: 80%+ Match Job Feed & Worldwide Remote Filters

Aggregated job listings filterable by 80%+ Top Match, 70%+ Match, or All Jobs across Worldwide Remote (USD), India, US, and Europe.

Direct Browser & Extension Sync Engine
Auto-Fill & Platform Sync Payload
Because job portals like Naukri and LinkedIn require authenticated sessions, Jojo syncs profiles via our automated background handler and browser companion payload.
Copy Sync JSON Payload
{
"profile": "Geeta Jogi",

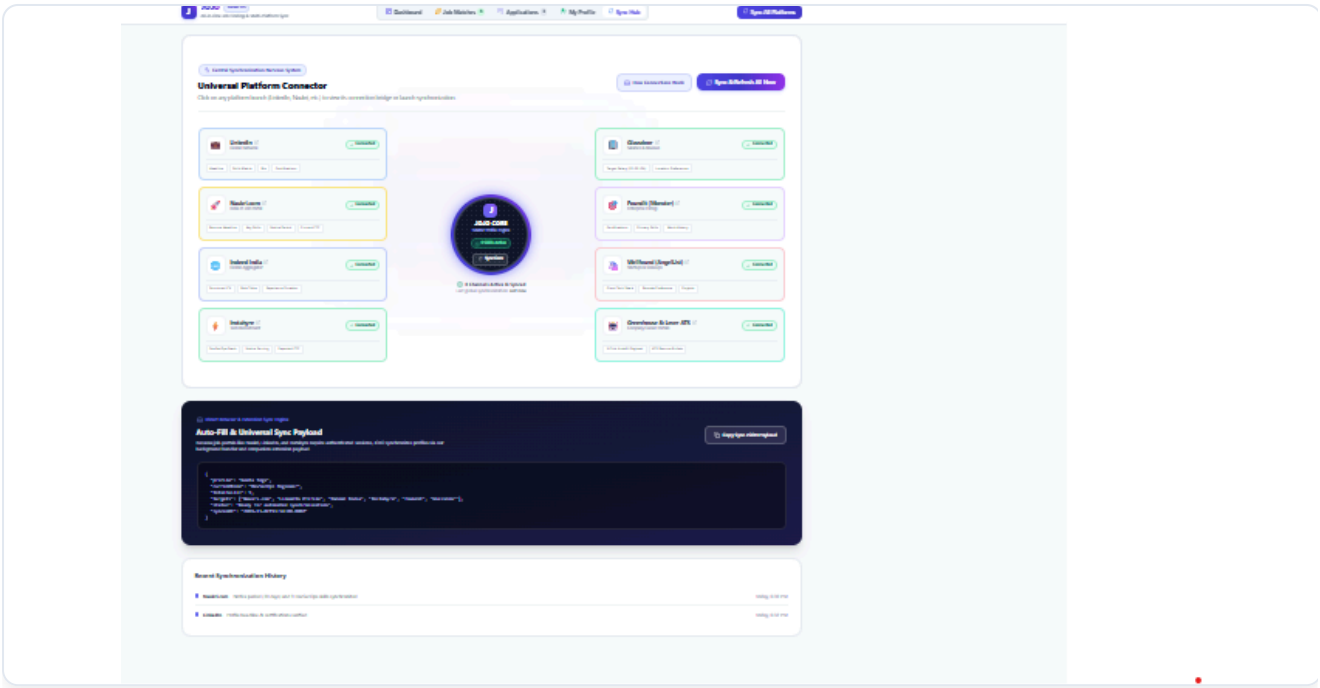

Screen 3: Universal Platform Connector & Sync Hub

Visual central core node connecting 8 satellite networks (LinkedIn, Naukri, Indeed, Instahyre, Glassdoor, Foundit, Wellfound, Greenhouse).

Screen 4: Auto-Fill & Isolated Sync Payload

Standardized digital package prepared for the companion extension to inject into external authenticated portals.

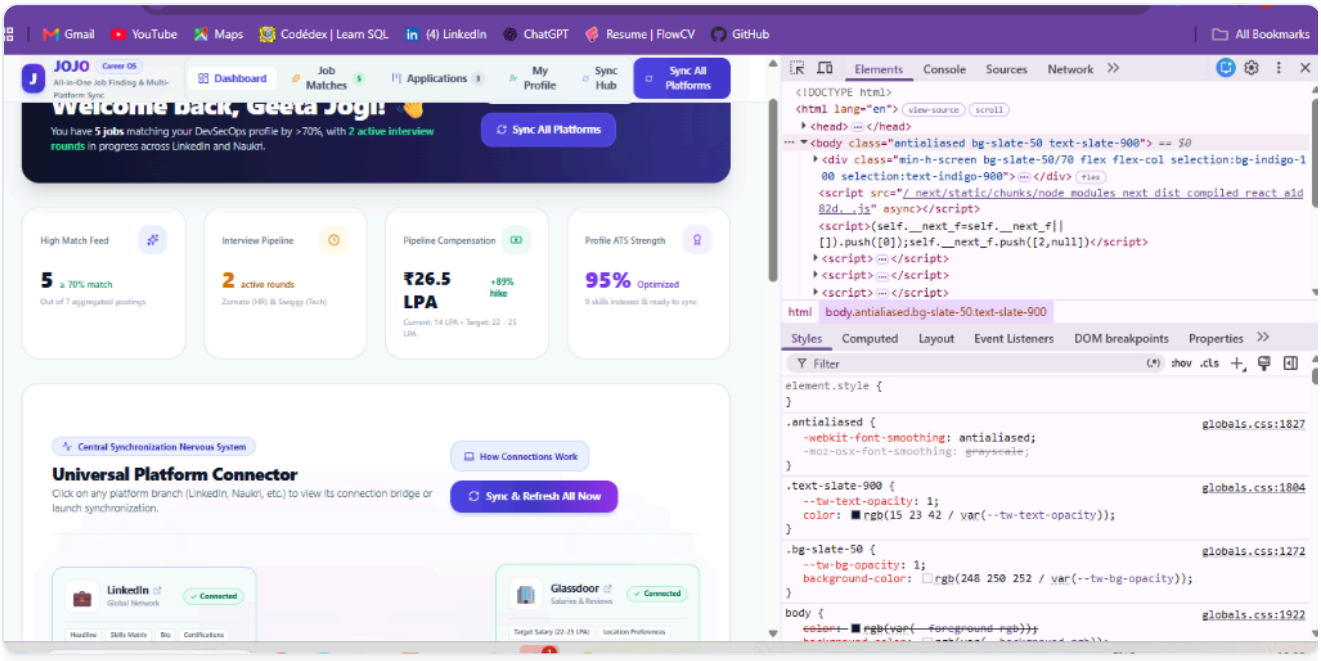

Universal Platform Connector
Auto-Fill & Universal Sync Payload

4. Companion Browser Extension & Mobile Guide

> **Why an Extension is Used:** Portals like LinkedIn and Naukri do not allow third-party servers to edit personal profiles. JOJO solves this using a lightweight Chrome Companion Extension that operates inside your authenticated browser session.

How to Install on Desktop

1. Open `chrome://extensions` → toggle on **Developer mode**.
2. Click **Load unpacked** → select the `extension` folder in the JOJO project.
3. Open LinkedIn or Naukri → click the floating purple **JOJO Sync** widget to auto-fill your profile details.

Running on Phones

- **On Android (Kiwi Browser):** Install Kiwi Browser from Play Store → Extensions → Developer Mode → Load unpacked → Pick JOJO folder. The extension runs natively on your phone!
- **On iPhone (Safari PWA):** Open in Safari → Tap Share → *Add to Home Screen*. Use 1-Tap Mobile Sync to copy tailored bullets directly into the mobile LinkedIn or Naukri app.

5. VAPT Security Audit & Verification Closure

A full Vulnerability Assessment & Penetration Testing (VAPT) audit was conducted and all critical security vulnerabilities have been patched:

Vulnerability	OWASP / CWE	Fix Implemented	Status
Plaintext Passwords	CWE-256 / CWE-916	Encrypted using 12-round bcrypt hashes ($2b$12$...).	**VERIFIED FIXED**
IDOR / Cross-User Snooping	OWASP API1 / CWE-639	HMAC session verification; cross-account queries blocked with HTTP 403.	**VERIFIED FIXED**
Brute-Force Login Attacks	OWASP API4 / CWE-307	Sliding window rate limiter: blocks with HTTP 429 after 5 failed attempts.	**VERIFIED FIXED**
Insecure Session Storage	CWE-384 / CWE-306	Signed session tokens + HttpOnly, SameSite=Lax cookies.	**VERIFIED FIXED**
CORS Vulnerabilities	CWE-942	Strict preflight origin whitelist (localhost & extension only).	**VERIFIED FIXED**

6. Quickstart: Running JOJO in 3 Steps

```
Step 1: Double-click START-JOJO.bat (or run "npm run dev") Step 2: Open http://127.0.0.1:3000 in your browser Step 3: Click "Log In" -> "One-Click Quick Login as Geeta Jogi" (password: password123)
```
