COMPREHENSIVE GUIDEBOOK & WORKBOOK

JOJO Career OS

All-in-One Job Search Command Center, ATS Scoring Engine, Multi-Platform Sync & Chrome Extension Manual

🎯 80%+ Match Engine
🔄 Universal Sync Hub
🧩 Chrome Companion
📱 Mobile & PWA Ready
🛡️ VAPT Hardened

1. Project Aim & What We Have Done

> **Our Aim:** Empower tech professionals to take full control of their job hunt. Instead of typing notice periods and CTC 6 times across fragmented websites, JOJO manages your master profile from one dashboard, spotlights 80%+ match roles, and auto-syncs across LinkedIn, Naukri, and Indeed.

What Has Been Built & Delivered

Capability	What It Does for You
Fullstack Next.js 14 Engine	High-speed Next.js Turbopack web application running locally or in cloud.
80%+ Match & ATS Algorithm	Ranks jobs by exact skill match and evaluates your resume against Greenhouse/Lever ATS formats.
Worldwide Remote USD Filter	Aggregates high-paying global remote roles ($90k–$150k USD) and Indian tech hubs.
Universal Sync Hub (8 Channels)	Connects LinkedIn, Naukri, Indeed, Instahyre, Glassdoor, Foundit, Wellfound, and Greenhouse.
Chrome Companion Extension	Browser extension that auto-fills your profile details into external job websites in 1 click.
7-Stage Kanban Tracker	Wishlist → Applied → Screening → Technical → Final → Offer with private notes.
1-Click AI Resume Tailor	Generates tailored 95%+ ATS resume bullets and cover letters for each job.
VAPT Security Hardening	Bcrypt 12-round password encryption, IDOR authorization barriers, and rate limiting.

2. How Other People See & Use JOJO

1. **Guest Preview Mode:** When any new person or teammate visits JOJO, they see a clean preview mode with live sample metrics and a welcome banner inviting them to sign in or create an account.

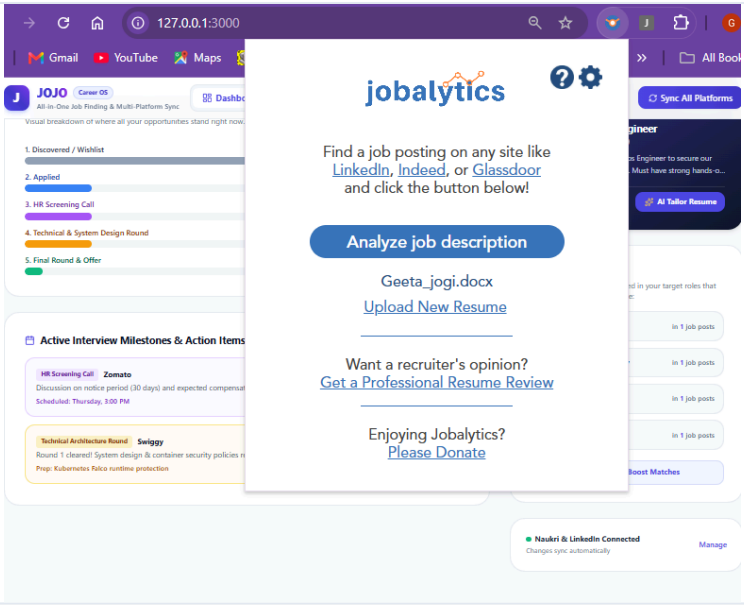

2. **Creating Their Account:** They click "Create Account" and input their name, email, password, target role, notice period, and preferred CTC.

3. **Complete Multi-Tenant Isolation:** JOJO automatically creates a private data bucket for them. Their skills, jobs, and platform connections are strictly isolated. User A never sees or overwrites User B's data.

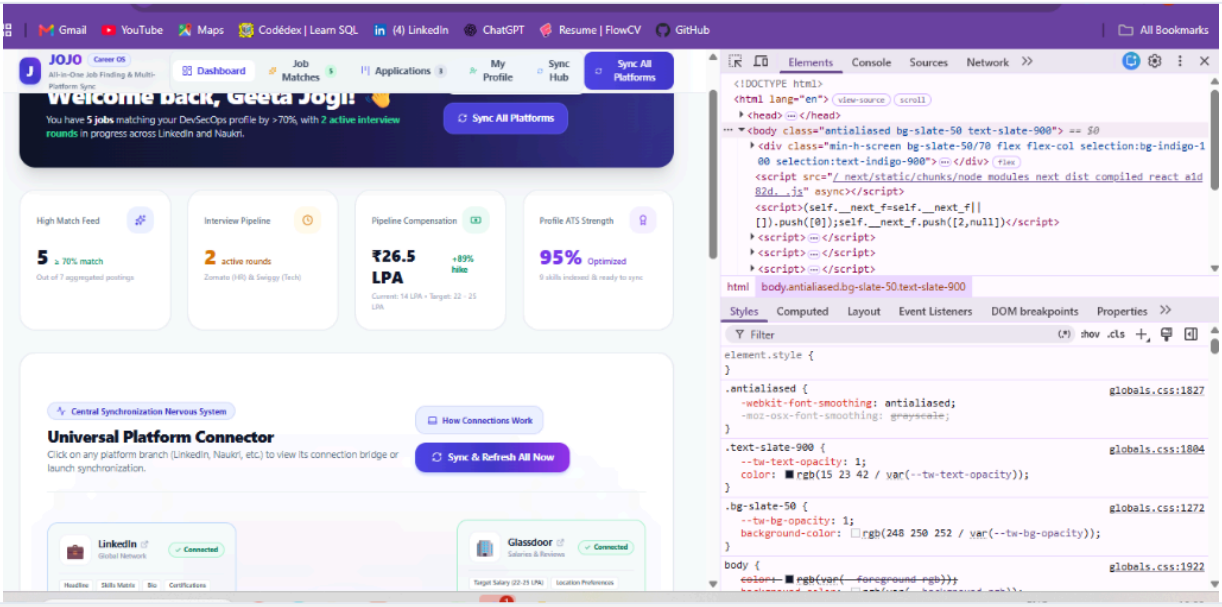

3. How the Extension Works After Installation

Once the extension is installed in your browser, here is exactly how it behaves on external job sites:

A **Extension Status in Chrome:** Clicking the extension icon in your toolbar shows your live connection status: `Engine Status: Connected` ✓ along with your active user name.

B **Floating Sync Badge on LinkedIn & Naukri:** When you open LinkedIn, Naukri, or Indeed, a floating purple **JOJO Sync** badge appears automatically in the bottom-right corner of your screen.

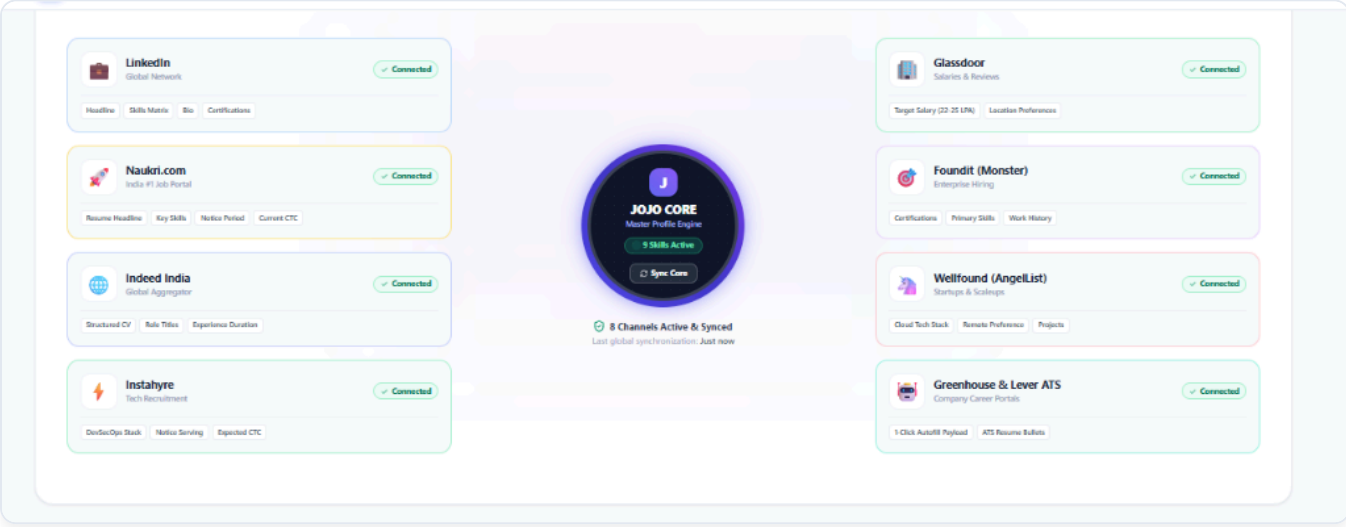

C **1-Click Auto-Fill:** Clicking the widget opens your profile details (headline, skills, 30-day notice period, CTC) and instantly auto-fills the application form or copies tailored bullets to your clipboard!

4. How to Put the Extension on Google Chrome

There are two ways to use the extension: locally right now, or published on the official Chrome Web Store for the public.

Method 1: Load Locally in Chrome (Available Right Now)

1. Open Google Chrome and type `chrome://extensions` in the address bar.
2. Turn on the **Developer mode** toggle switch in the top-right corner.
3. Click **Load unpacked** in the top-left corner.
4. Select the `extension` folder inside your JOJO project directory. The extension is now live and working!

Method 2: Publishing to the Official Google Chrome Web Store

To let anyone in the world install your extension with a single click from the Chrome Web Store:

1. **Zip the Extension:** Right-click the `extension` folder → Send to → Compressed (zipped) folder (named `jojo-extension.zip`).
2. **Open Developer Console:** Navigate to `chrome.google.com/webstore/devconsole`.
3. **Register as a Developer:** Sign in with your Google account and pay Google's one-time $5 developer registration fee.
4. **Upload Package:** Click "*New Item*" and upload your `jojo-extension.zip`.

5 **Fill Store Listing:** Add Title ("JOJO Sync Companion"), Description, Store Screenshots, and Category (Productivity).

6 **Submit for Review:** Click "*Submit for Review*". Google reviews it (usually 24-48 hours), and your extension goes live with a public "*Add to Chrome*" button!

5. The JOJO Hands-on Workbook & Action Checklists

Use these actionable worksheets to guide your daily job search workflow:

📝 Worksheet 1: Master Profile Configuration

[ ] **1.1:** Open JOJO at `http://127.0.0.1:3000` and log in.
[ ] **1.2:** Go to **My Profile** and enter your Current CTC, Expected CTC, and Notice Period.
[ ] **1.3:** Add your primary skills and mark them as Expert or Intermediate.
[ ] **1.4:** Click *Save Changes* to update your sync payload.

📝 Worksheet 2: 80%+ Match Job Hunt

[ ] **2.1:** Open the **Job Matches** tab.
[ ] **2.2:** Click the **80%+ Top Match** filter.
[ ] **2.3:** Switch location to **Worldwide Remote** to view USD salary openings.
[ ] **2.4:** Move high-priority roles to *Wishlist* or *Applied*.

📝 Worksheet 3: Extension Auto-Fill Workflow

[ ] **3.1:** Open LinkedIn or Naukri on your browser.
[ ] **3.2:** Look for the purple floating **JOJO Sync** widget in the bottom-right corner.
[ ] **3.3:** Click the widget to auto-fill your headline and skills.
[ ] **3.4:** Submit your application and track it on your JOJO Kanban board!

> **JOJO Career OS — Built for Speed, Privacy, and High-Velocity Career Growth.**
> Double-click `START-JOJO.bat` or run `npm run dev` to launch your command center anytime.
